

Azlan Malik

DevOps engineer · AI agents in operations

azlanmalik.com · hi@azlanmalik.com · linkedin.com/in/azlanmalik · github.com/AzlanMalik · Karachi, Pakistan

SUMMARY

DevOps engineer with three years running production infrastructure: moving whole platforms to new clouds, getting them to ISO 27001 and GDPR, cutting cloud bills, and setting up startups from scratch. Now building the agent layer on top: AI agents that propose changes, check them against policy and wait for a person where it matters.

EXPERIENCE

Xceed365 · DevOps and AI platform engineer May 2026 to now

I led the migration of the complete infrastructure to a new cloud provider and rebuilt it as multi-tenant and highly available across availability zones, so enterprise customers get isolation and uptime by default. I also build the AI agent tooling the team uses to ship and operate the platform.

An enterprise-ready platform: ISO 27001 and GDPR achieved, tenants kept apart, no single data center to take it down, and lower cloud costs.

Sehat Kahani · DevOps and data engineer Apr 2024 to May 2026

I led the migration of the entire infrastructure to a new cloud provider, built it to meet ISO 27001 and GDPR, and managed the business intelligence dashboards the company ran on.

45% off the monthly cloud bill

Neem · DevOps engineer Mar to Nov 2024

I led the deployment and upkeep of the cloud environment, working with the product and security teams to keep it scalable, available and secure.

A scalable, highly available cloud base the product team could ship on, kept secure as the platform grew.

ZETSOL Technologies · DevSecOps engineer May 2023 to May 2026

I managed infrastructure for several startups at once: set each one up from scratch, with CI/CD and the tooling around it, and kept their cloud costs in check as they grew.

Each startup had production-ready infrastructure from the first release, and cloud bills that matched its stage.

Freelance · DevOps, on the side Now and then, alongside full-time work

Small, well-defined jobs: setting up a pipeline, getting an app deployed, tidying up a cloud setup.

BUILDING

Auton useauton.com

An agentic development environment: Claude Code, Codex and Gemini side by side, in panes you can watch.

MunshiPlus munshi.easybiz.site

A free, offline-first order and collection tracker for Pakistani wholesale businesses, on Google Play.

EDUCATION

Bachelor of Engineering, Software Engineering

Mehran University of Engineering and Technology

SKILLS

Cloud migrations · Kubernetes · Terraform · CI/CD · Linux · Docker · Python · ISO 27001 and GDPR · Cost optimisation · High availability · AI agents in operations

CERTIFICATION

IBM DevOps and Software Engineering

IBM, via Coursera
